TREV

The figure shows a genetic map of chromosome V with two gene loci highlighted. The top part shows the overall chromosome structure with labels (P), (P), (P), and (T) above it. Below this, a detailed scale from 14 to 20 is shown. Two specific regions are identified: one at approximately position 14.7 labeled 'Cyp23061 VA' and another at approximately position 17.3 labeled 'Cyp23050 VA'. A third label 'Cyp23057 TREV' is visible on the far right. The map includes various markers and distances indicated by numbers along the axis.

●

TREV

Genetic map of the 23053s region on chromosome 17p11.2. The map shows the location of the 23053s gene and several polymorphic markers. The markers are labeled with their names and positions: 23038s (position 21), 23038 (position 38), 23038s (position 17), 23053s (position 43), 23053s (position 50), 23053s (position 10), and 23053s (position 18). The map also shows the location of the 23053s gene and the 23053s gene. The map is oriented with the centromere (C) on the left and the telomere (T) on the right. The map is labeled with the chromosome number 17 and the band p11.2.

●

TREV

Genomic map of the 23040s and 23065s regions. The 23040s region (left) shows a cluster of genes: REF2, TREV, Cvp_23029, and VA. The 23065s region (right) shows a cluster of genes: Cvp_23055, VA, Cvp_23050, and TREV. The map includes a scale bar from 12 to 20 kb and a gene density scale from 10 to 30.
